

2024 IEEE 24th International Conference on Communication Technology

Track 10. Communication And Information Security

With the rapid development of information technology, communication and information security issues are becoming increasingly prominent. How to improve network information security to protect users' personal privacy rights and prevent information leakage and abuse is crucial to be considered from multiple levels including the physical layer, network layer, and application layer etc. This track will focus on the latest research in the field of network communication and information security.

Topics

01. Communication privacy and anonymity
02. Information system security and management
03. Information security algorithms and protocols
04. Intelligent communication/information security
05. Application of Blockchain in information security
06. Network privacy protection and management
07. Security breaches and attack monitoring
08. Encrypt communications
09. Optical physical layer security
10. Key agreement protocol
11. Other related topics

Track Chairs

**Hui Yang**Beijing University of Posts and
Telecommunications, China**Qiuyan Yao**Beijing University of Post and
Telecommunications, China**Nan Feng**The 54th Research Institute of
CETC, China**Huatao Zhu**National University of Defense Te
chnology, China

Paper Submission Deadline

July 10th, 2024

Notification of Acceptance

August 5th, 2024
